

# JOIN THE BUTTERFLY COUNT

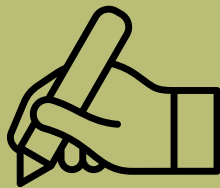

Butterflies are counted by volunteers around the world to help scientists monitor populations and protect species.

We use math to research and conserve butterflies.

Count the butterflies in the room to learn about our methods!

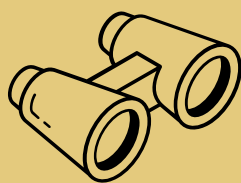

1

Fill out the sampling sheet with:

- Your name
- The color of your clicker
- The time you start counting butterflies

2

Begin counting butterflies!

*Try not to spend more than 5 minutes counting.  
Spending as little as a few seconds is okay!*

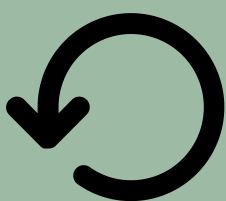

3

Hints:

*All the butterflies are in this room and can be seen from the main walkways.  
Count butterflies only!*

4

When complete, record:

- How many butterflies you counted
- The time you finished counting

**Please return the clicker if you borrowed one!**

5

Return your data sheet. As we enter your data, watch how your data affects our model of how many butterflies are in the room
